

FOR IMMEDIATE RELEASE

European DataWarehouse Joins Leaseurope

Brussels, 7 June 2018 – Leaseurope, the trade body representing the leasing and automotive rental industry in Europe, is proud to announce that European DataWarehouse has joined the organization as its latest associate member.

European DataWarehouse (ED) is the first centralised data repository in Europe for collecting, validating and distributing detailed, standardised and asset class specific loan level data (LLD) for Asset-Backed Securities (ABS) and private whole loan portfolios. Operating as a market infrastructure and endorsed by the Eurosystem, ED aims to increase transparency and restore confidence in the ABS market. Through ED data, users are able to analyse underlying portfolios in a more efficient way and compare portfolios on a systematic basis. ED currently hosts data for more than 1100 public ABS transactions across Europe.

“The European DataWarehouse is proud to join Leaseurope as an associate member. The membership offers the unique opportunity to contribute to European policies and to learn from the leaders in the European leasing and automotive rental industries. Being the designated repository for loan-level data stemming from European ABS transactions, I am confident that the 13 million auto and leasing loans we have collected will allow us to contribute to the ongoing development of Leaseurope’s important work.” said Dr. Christian Thun, CEO of European DataWarehouse.

Leaseurope’s Chair and Executive Vice President, DNB Morten Guldhaug stressed: “By building alliances and welcoming new high-profile associate members such as European Datawarehouse, we are ensuring that Leaseurope further strengthens its position as a unique hub where the industry and its many partners come together.”

About Leaseurope

As a Federation, Leaseurope brings together 45 associations throughout Europe representing either the leasing, long term and/or short term automotive rental industries. The scope of products covered by Leaseurope’s members ranges from hire purchase and finance leases to operating leases of all asset types (automotive, equipment and real estate) and also includes the rental of cars, vans and trucks. It is estimated that Leaseurope represents approximately 94% of the European leasing market. Find out more at www.leaseurope.org.
