## LEASEUROPE

European Federation of Leasing Company Associations

### Updated table of 2006 Ranking

### Leaseurope releases its Ranking of European Leasing Companies – Top 100 Leasing Firms in 2006

BRUSSELS – October 2007

Leaseurope, the European Federation of Leasing Company Associations, is pleased to present its 2006 Ranking of the Top 100 European Leasing Companies. The ranking survey is in its sixth year running and leasing volumes of the Top 100 companies are made available to the public for the fourth time.

In the survey, European leasing companies are ranked according to the total value of their new contracts. These figures are shown in the attached tables, on a consolidated basis, for the top 100 parent and independent leasing companies 2006.

It is important to note that the ranking is based on data provided *on a voluntary basis by the firms themselves* and that the released figures cover European activities only.

A total number of 207 organisations responded to the survey, out of which 176 are defined as parent companies (i.e. head of a leasing group, regardless of whether this group itself is part of a larger banking group) and the survey has a wide geographical reach with responding companies located in 28 different countries, both EU and non-EU member states.

With over 180 billion € worth of new contracts, the top 100 parent and independent companies surveyed represent approximately 60% of the total 2006 Leaseurope market. The top ten companies of the 2005 ranking account for roughly 45% of the value of new contracts included in the survey and for 28% of the total Leaseurope market.

These firms are members of the 48 member associations covered by Leaseurope, which in turn represent more than 1,500 European leasing companies. Grouped together within Leaseurope, they represented more than 92% of the entire European leasing market in 2006.

The full version of the survey, including rankings per asset category, is available for Leaseurope members and those companies who took part in the survey.
